

Naissance et mort du système solaire

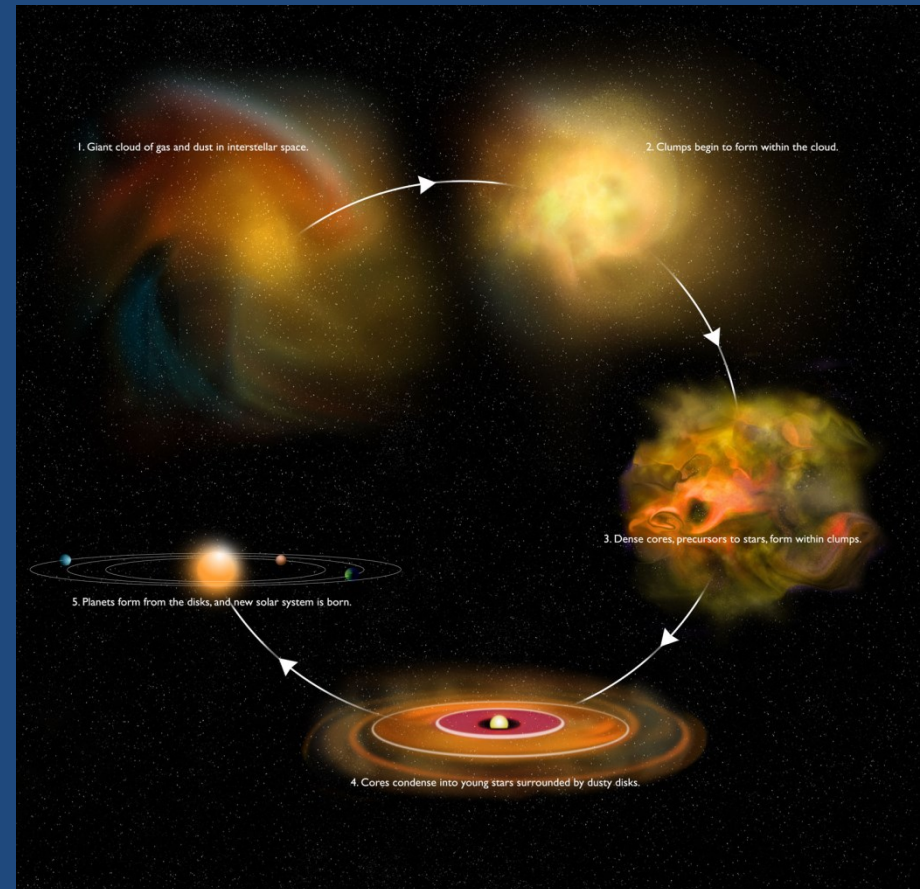

- La naissance du soleil
- La naissance des planètes
- La mort de notre étoile et de notre système solaire

Il y a 4,6 milliards d'années

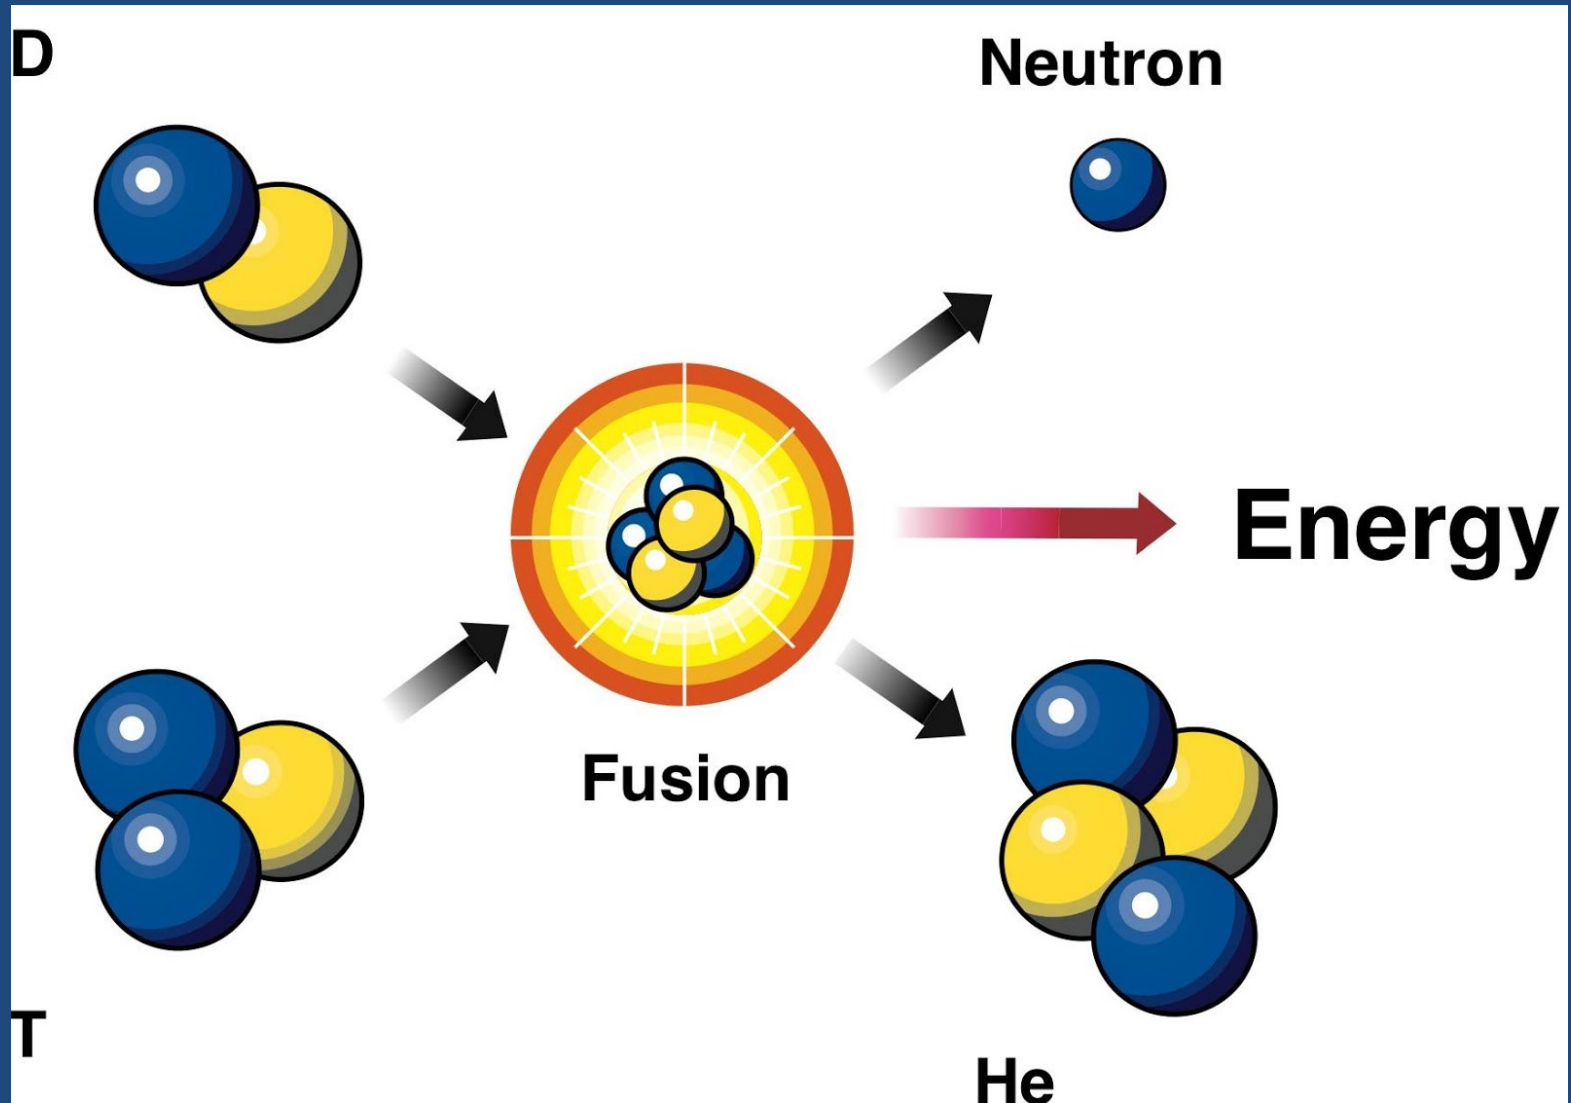

La voie Lactée:

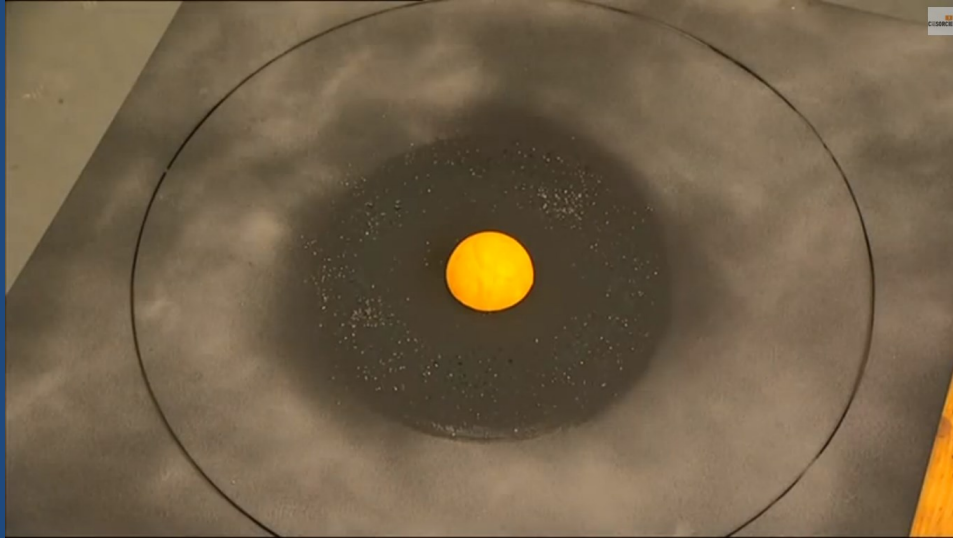

Etape formation du soleil:

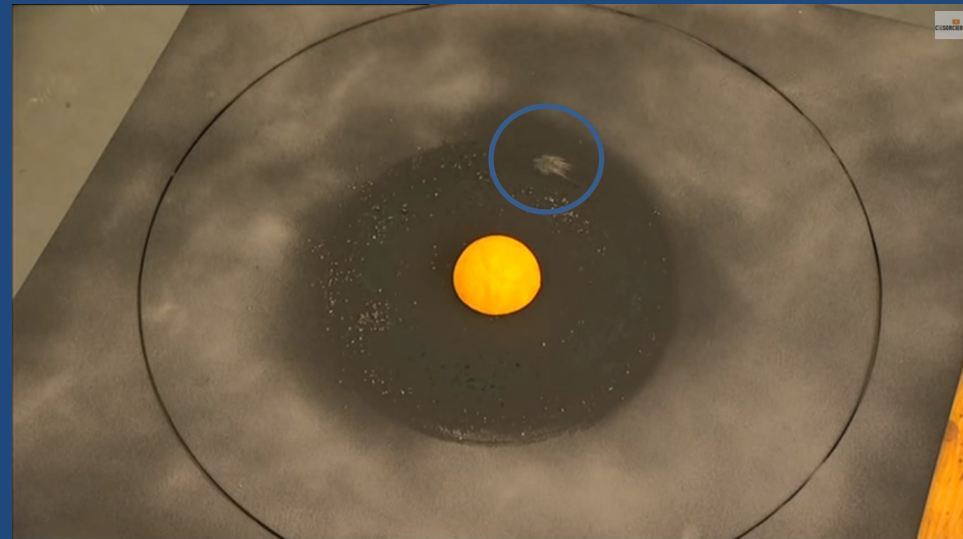

La fusion thermonucléaire

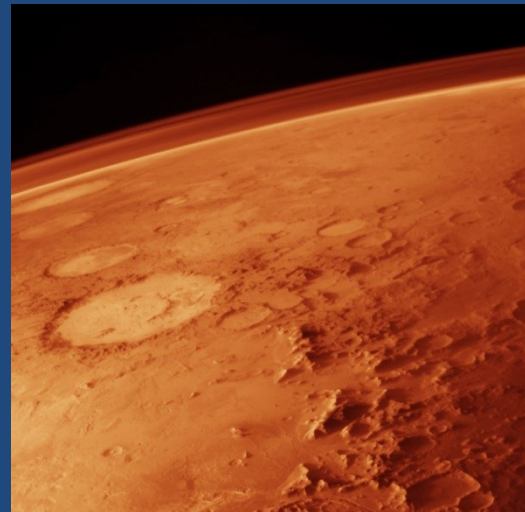

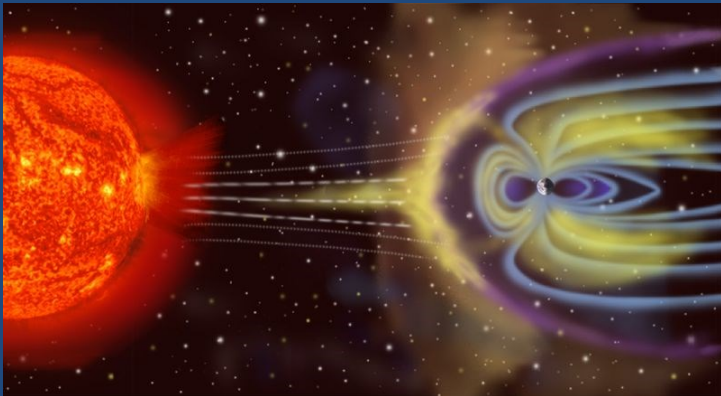

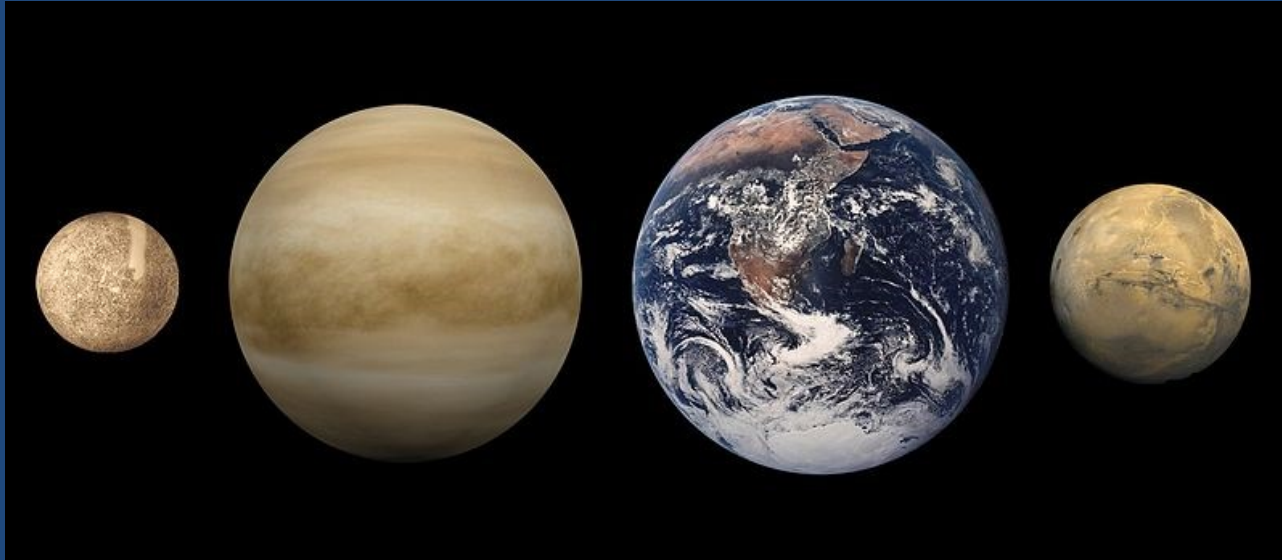

Disque protoplanétaire

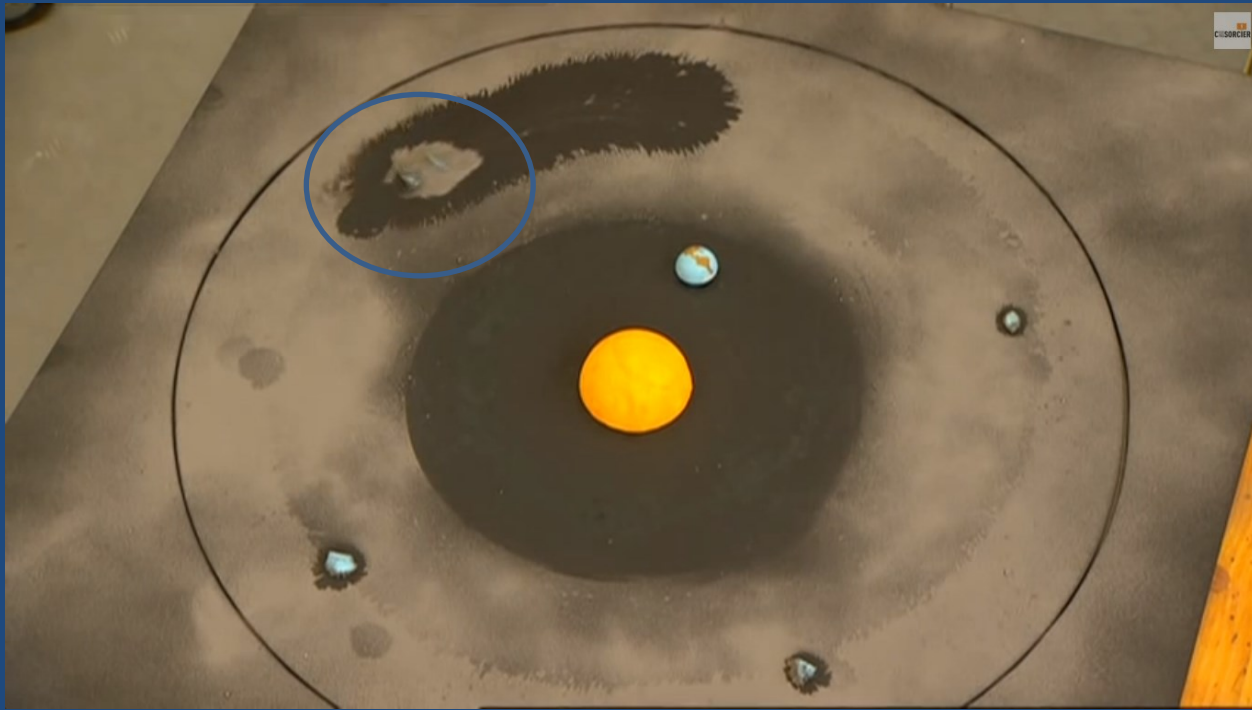

Des zones se sont
agglomérées

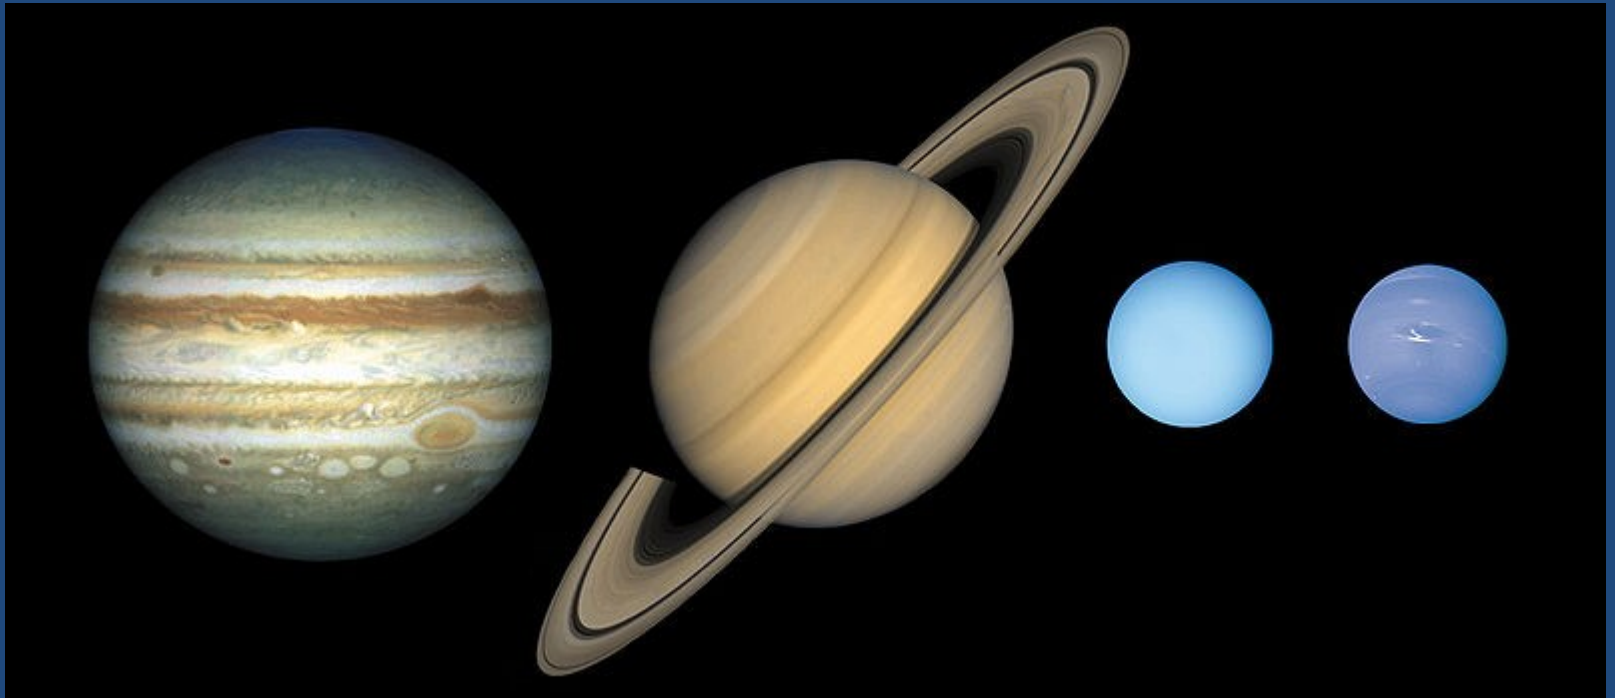

Diversité des planètes

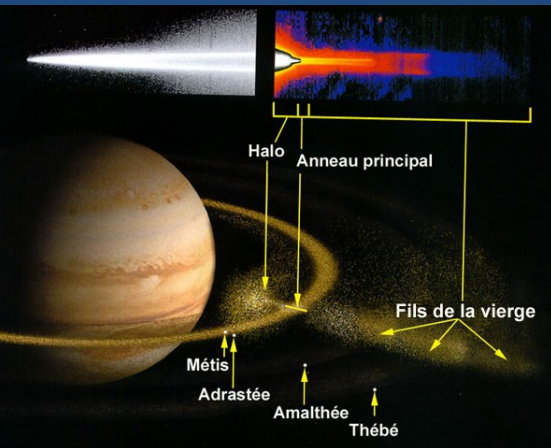

Formation des planètes gazeuses

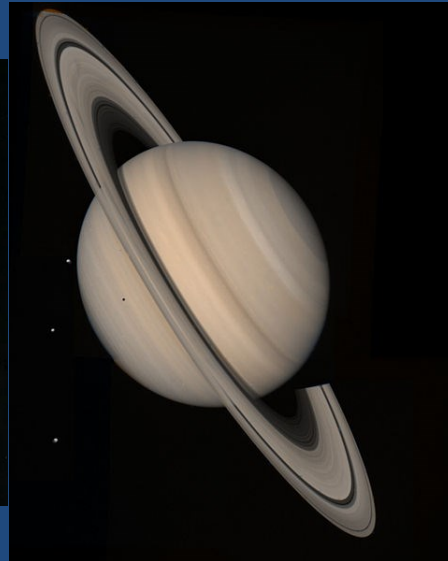

Les planètes gazeuses

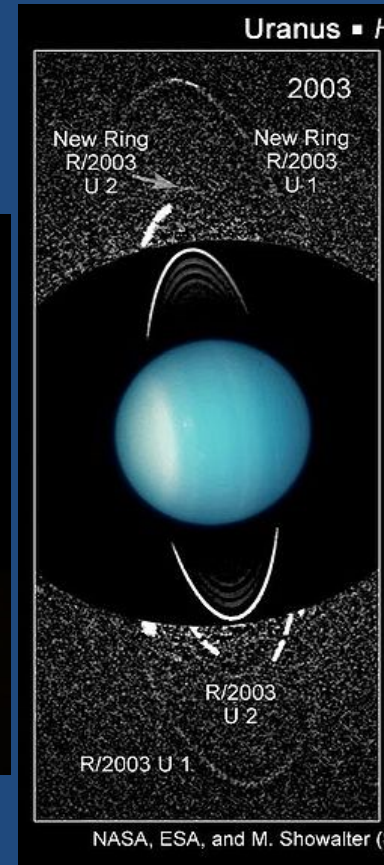

Les anneaux

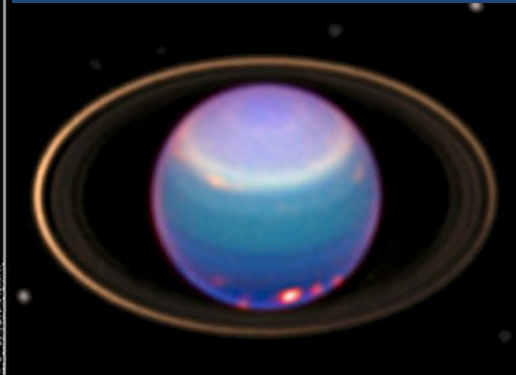

Jupiter

Saturne

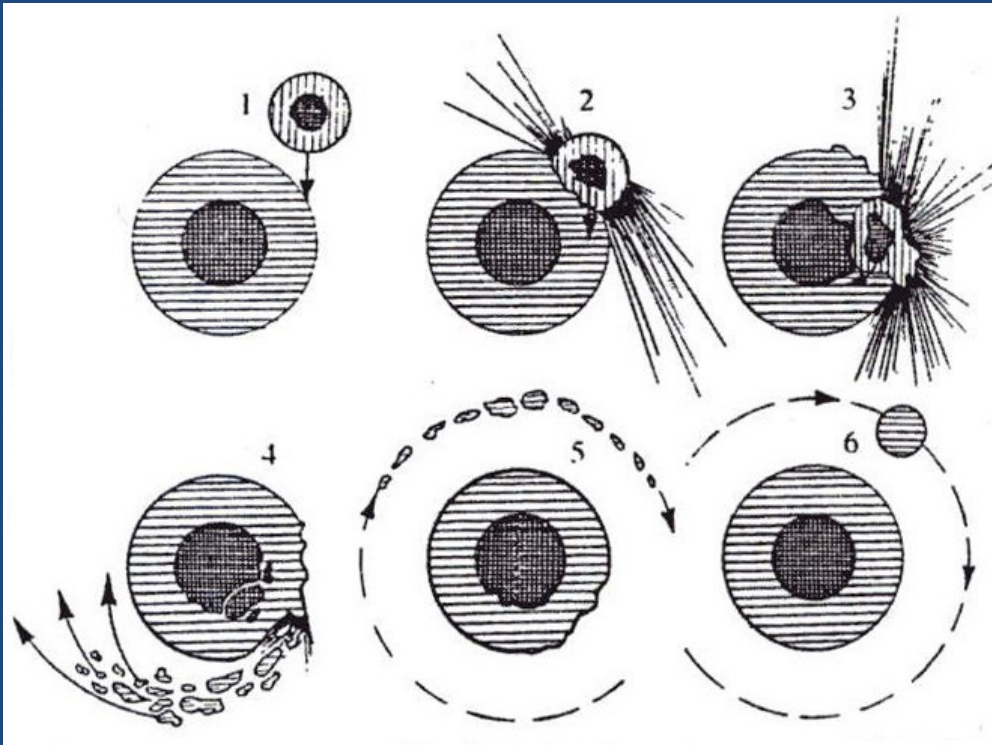

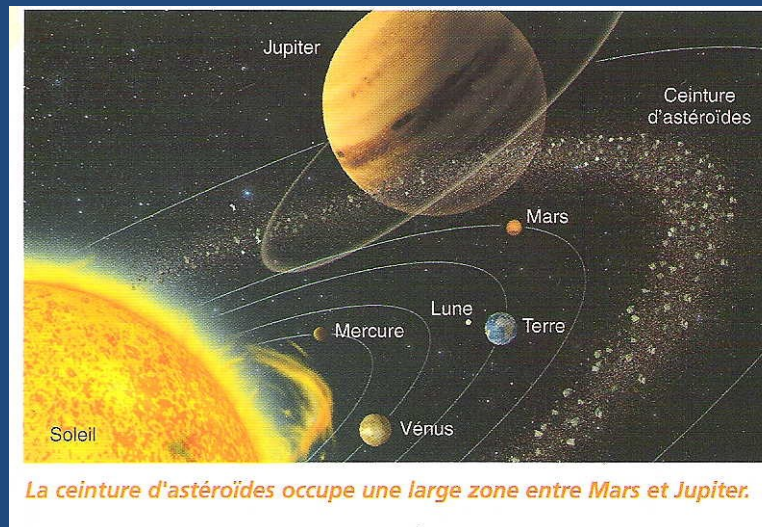

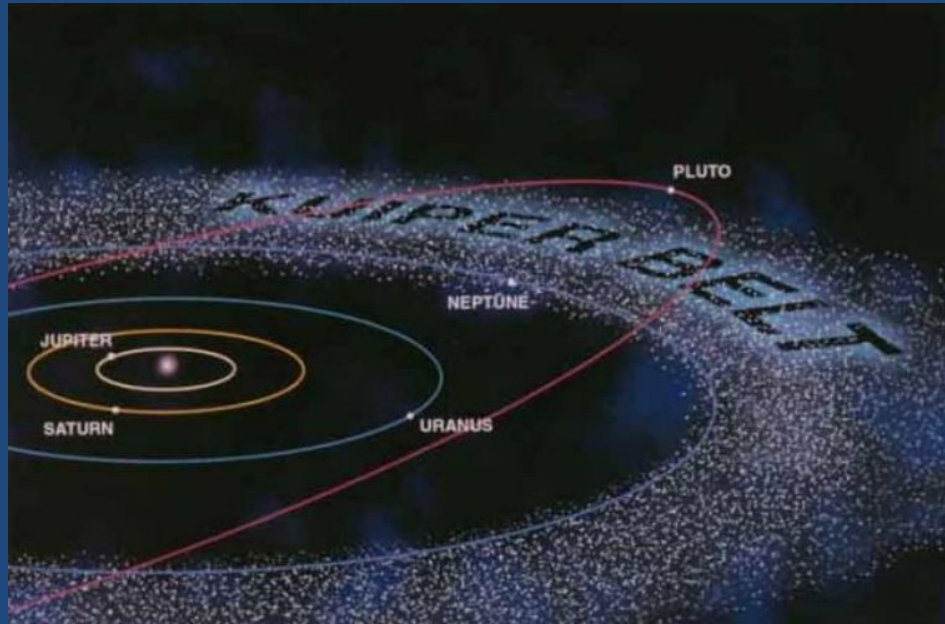

Uranus

Neptune

Formation des satellites

Mort de notre étoile
